

High Vacuum Units

Hose reel for High Vacuum

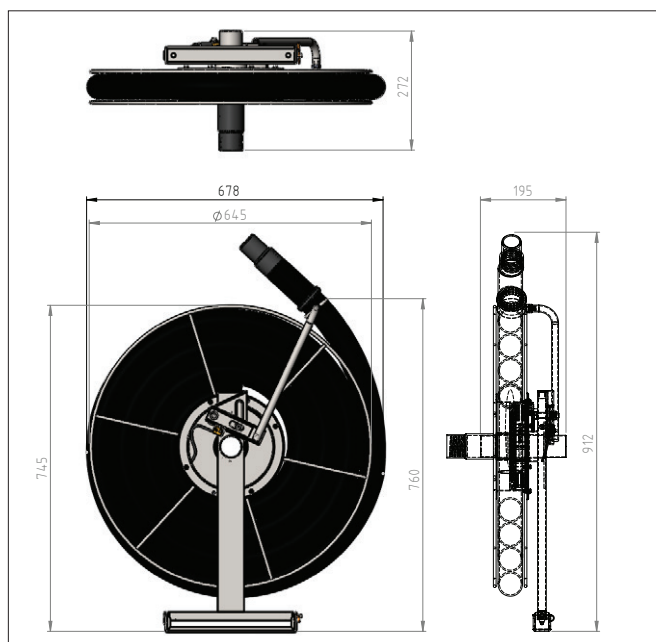

Geovent HVU hose reel is a robust and easy to use hose reel for high vacuum systems. The hose reel has a number of characteristics that makes it practical and user-friendly. The hose is antistatic.

After use, the hose is automatically rolled back onto the hose reel, saving time and hassle in handling it. The hose stop is easy to adjust and allows the user to select the optimum length of hose based on the individual task. The hose reel has a micro switch fitted, so that the pressure in the hose is automatically activated when the hose is unrolled.

The hose reel is designed for easy installation. It is made of painted steel and the hose is antistatic and made of polyethylene and elastomer.

Dimensions

Ordering table

Art. no.	Description	Dimension [mm]
